

Discharge Summary for Alex Rivera, MRN 001-88421, born 1978-04-12.

Chief Complaint: Alex presented with symptoms of shortness of breath and wheezing.

History of Present Illness: A 47-year-old male with a history of asthma experienced two days of cough, wheezing, and shortness of breath following upper respiratory infection symptoms.

Past Medical History: Asthma and seasonal allergic rhinitis.

Medications at Discharge: Alex was prescribed Albuterol inhaler, 90 mcg, 2 puffs inhaled every 4-6 hours as needed for wheezing; Prednisone 40 mg orally daily for 5 days; and Cetirizine 10 mg orally daily.

Vital Signs and Observations: Oxygen saturation was 94% on room air, and peak flow was 320 liters per minute.

Procedures: Nebulized bronchodilator treatment was administered in the emergency department.

Assessment and Plan: Alex was diagnosed with an asthma exacerbation and was advised to continue the steroid burst and rescue inhaler. A follow-up appointment with his primary care physician was scheduled for one week.

Discharge Summary for Alex Rivera, MRN 001-88421, born 1978-04-12.

Chief Complaint: Alex presented with symptoms of shortness of breath and wheezing.

History of Present Illness: A 47-year-old male with a history of asthma experienced two days of cough, wheezing, and dyspnea following upper respiratory infection symptoms.

Past Medical History: Alex has a history of asthma and seasonal allergic rhinitis.

Discharge Medications: On discharge, Alex was prescribed albuterol inhaler 90 mcg, to be inhaled 2 puffs every 4-6 hours as needed for wheezing; prednisone 40 mg orally daily for 5 days; and cetirizine 10 mg orally daily.

Vital Signs and Observations: Alex's oxygen saturation was 94% on room air, and his peak flow was 320 L/min.

Procedures Performed: In the emergency department, Alex received nebulized bronchodilator treatment.

Assessment and Plan: Alex's condition was assessed as an asthma exacerbation. He will continue with a steroid burst and rescue inhaler therapy. A follow-up appointment with his primary care physician is scheduled for one week.

Discharge Summary for Alex Rivera, MRN 001-88421, DOB 1978-04-12

Chief Complaint: Alex Rivera presented with symptoms of shortness of breath and wheezing.
