

Here is the rewritten clinical note:

Evelyn Chen, MRN 007-22018, born 1971-12-01, underwent preoperative evaluation on 2026-03-02.

The planned surgical procedure is a right total knee arthroplasty.

Evelyn's medical history includes osteoarthritis of the right knee and hyperlipidemia.

She is currently taking atorvastatin 20 mg orally at bedtime and naproxen 500 mg orally twice daily as needed for pain, with instructions to hold the naproxen for 7 days prior to surgery.

Vital signs and physical assessment revealed a BMI of 31.2 kg/m² and an LDL level of 168 mg/dL.

Based on the evaluation, surgery is proceeding as planned, and the DVT prophylaxis plan has been reviewed.

Here is a rewritten version of the clinical note:

Clinical Summary for Evelyn Chen (MRN: 007-22018, DOB: 1971-12-01)

Preoperative Evaluation

Date: 2026-03-02

Upcoming Surgery

Evelyn is scheduled to undergo a right total knee arthroplasty.

Medical Background

Evelyn has a history of osteoarthritis affecting her right knee and hyperlipidemia.

Current Medications

She is currently taking atorvastatin 20 mg orally at bedtime and naproxen 500 mg orally twice daily as needed for pain, with instructions to hold the naproxen for 7 days prior to surgery.

Vital Signs and Laboratory Results

Evelyn's body mass index (BMI) is 31.2 kg/m², and her low-density lipoprotein (LDL) cholesterol level is 168 mg/dL.

Assessment and Plan

Based on the evaluation, Evelyn is cleared for surgery, and her DVT prophylaxis plan has been reviewed and implemented.

Here is a rewritten version of the clinical note:

Evelyn Chen, MRN 007-22018, born 1971-12-01, underwent preoperative evaluation on 2026-03-02.

The planned surgical procedure is a right total knee arthroplasty.

Evelyn's past medical history includes osteoarthritis of the right knee and hyperlipidemia.

Her current medications are atorvastatin 20 mg orally at bedtime and naproxen 500 mg orally twice daily as needed for pain, with instructions to hold the naproxen for 7 days prior to surgery.

Physical observations include a body mass index of 31.2 kg/m² and a low-density lipoprotein cholesterol level of 168 mg/dL.

Based on the evaluation, it was determined that Evelyn is a suitable candidate for surgery. The plan for deep vein thrombosis prophylaxis was reviewed and will be implemented accordingly.
