

OUTPATIENT NOTE

Patient: Aisha Johnson, MRN: 009-99110, DOB: 1988-06-05

Date of Visit: 2026-04-08

Clinical Summary:

The patient's primary concern is migraine headaches without aura.

Current Medications:

She is currently taking Sumatriptan 50 mg orally at the onset of a headache, with the option to repeat the dose every 2 hours as needed. Additionally, she is prescribed Propranolol 20 mg orally twice daily for migraine prevention.

Vital Signs and Examination:

Her blood pressure was recorded at 118/74 mmHg. A neurological examination was conducted, which revealed normal findings.

Management Plan:

To manage her migraines, the patient is advised to avoid triggers and maintain a headache diary. A follow-up appointment is scheduled for 6 weeks to reassess her condition.

OUTPATIENT NOTE

Patient: Aisha Johnson, MRN: 009-99110, Date of Birth: 1988-06-05

Assessment:

The patient's primary concern is a migraine without aura.
